Employee's Comments

Because of the turnover of HK BA and SG accountant, and constant overloaded, not much time could be focused on this project.

Employee's Comments

There are many processes could be organized and collaborated better with SharePoint. Especially, it is crucial for an international business like OTT.

With the collaboration platform and better organize and automate the process, one person effort (input) could be used by different teams if planned properly.

It would save a lots of time and improve the quality of the work.
